

LINDA LAFLAMME

Born in Montreal, Linda Laflamme began experimenting with painting at the young age of ten.

Today, she draws inspiration from nature and the inescapable passage of time, exploring this subject through abstraction and mix-media. Luminous shades of copper, gold and silver are applied in transparency over heavily textured surfaces, resulting in an experience that is at once tactile and visual. Through these different applications of paint, figures, objects and landscapes tend to emerge.

Always conscious of the environment, Laflamme is unafraid to incorporate fragments of glass, paper and other recycled items to her work in order to pay homage to Mother Earth. These everyday objects, sprinkled across the surface and coated with a palette inspired by precious metals, glisten under a lustrous coat of varnish. The beauty and quality of Laflamme's work is sure to attract the viewer who will want to discover its every detail and nuance.

«To paint is to see the beauty in everything and get inspired!»
